

PERSONNEL LIFTING PLATFORMS FOR LOCOMOTIVE ENGINE ASSEMBLY

SPECIALTY SOLUTION #164

ADVANCED MANUFACTURING

- 4,000 lb lift capacity, hydraulic actuation, 56" x 190" platform area, 61" vertical travel
- Custom engineered specifically for application
- Five (5) powered extensions, 35" wide with 21" extension distance, 300 lb capacity powered by electric cylinders
- Locking gates at base to prevent personnel from walking underneath when platform is raised

**H**andling Specialty designed and manufactured six (6) personnel lifts for an international engine manufacturer in the USA. The lifts will be operated in pairs and will allow technicians to position themselves at different elevations throughout the assembly process of large engines (such as locomotive engines).
