

PORTABLE HYDRAULIC THEATER LIFTS

SPECIALTY SOLUTION #125

ENTERTAINMENT

- Vertical travel rate of 2.4" per second, low height of 8.5", 2,000 lb. capacity
- Four scissor lifts with various-sized platforms used in a serpentine pattern to lift and lower sections of the "pier"
- Actuated by double acting hydraulic cylinders, designed for cantilevered loading
- Lifts feature soft starts/stops and minimal noise
- Lifts are easily taken down and transported to each show

Handling Specialty custom engineered and manufactured custom lifts for a traveling stage production of a major musical which appeared in the cities of New York, Toronto and San Francisco.
